Rhino Tuff Tanks Manufacturers Warranty

- RTT products are guaranteed to be free from manufacturer's defects or we will replace the product at no cost to you. Please contact your RTT representative for details.
- Accessories such as valves, fittings, hoses and sealers must be compatible with the fluids in the tanks. Use of fluids which are not compatible voids all manufacturer's warranty.

Rhino Tuff Tanks (RTT) Product Specifications, Instructions, Standards & Warnings:

- ✓ RTT Tanks are cleaned and inspected prior to shipping but should be checked for contaminant's and damage before filling.
- ✓ RTT is not responsible for fluid loss or clean-up.
- ✓ RTT Tanks may experience minor sidewall bowing when full.
- ✓ Sharp objects should be kept clear of tanks to prevent puncturing.
- ✓ Do Not store tank near high heat or an open flame. Do Not store fluids with a flashpoint lower than 200° F in Rhino Tuff Tanks.
- ✓ It is recommended that RTT Tanks be placed on RTT designed stands or a level ground surface.
- ✓ RTT recommends Rector Seal No. 5° to be used to seal all threads before use. Note: reducer bushing located at the bottom of tank has been sealed by the manufacturer prior to shipping.
- ✓ RTT Tanks are manufactured from UL food grade rated polyethylene resins and are designed for use with polyethylene tolerant fluids.

Resins used in RTT Tanks are listed with the NSF as meeting the NSF 51 requirements and meet or exceed specifications contained in FDA Regulation 21 CFR 177.1520 (2) 3.1 and may be used as an article or a component of articles intended for use in contact with food, subject to any limitations in the regulations.

Rhino Tuff Tanks are designed for use with polyethylene tolerant fluids and accessories with flashpoints over 200° F.

Some examples include:

Adhesives	Dyes	Oils
Anti-freeze	Food Products	Paints
ATF	Herbicides	Pesticides
Chemicals	Hydraulic Fluids	Synthetic Oils
Inks	Industrial Fluids	Syrups
Cutting fluids	Water	Class IIIB liquids
Degreasers	Liquid Feeds	And Many More...
Detergents
