

## → Comdata® SmartSite GX EMV Outdoor Payment Terminal Unattended Fueling Solution

- ↘ Increase your gallons sold and maximize transaction volume with expanded fleet card and other payment acceptance
- ↘ Improve data security and risk management with DSS & PCI P2PE compliance
- ↘ Increase your site utilization with cloud and web based reporting
- ↘ EMV enabled acceptance on the GX Unit

For today's drivers, time is more precious than ever. Every minute spent waiting is a minute off the road and money out of your pocket. That's why the Comdata SmartSite GX is built to deliver the quickest, most convenient fuel stops in America.

With the industry's fastest payment processing, quick and simple driver operation, easy back office training and administration, PCI-compliant data security, and real-time operational alerts, the GX equips you to give today's fleets what they want—superior service and convenience.

## SmartSite GX Performance Features:

- Increase your gallons sold each month with full fleet and consumer card acceptance 
- Help reduce fraud and create a secure transaction environment with EMV card readers 
- Allows for Mobile Pay and Pin based debit transactions which helps with speed and reducing costs at your fueling locations
- Integrated camera that adds an extra layer of security 
- Super-durable, METAL, full alpha-numeric keypad with function keys plus encrypted pin pad option 
- Real time pricing updates, cloud based data transfer and storage along with web based back office feeds

## We Accept All Major fleet and bank cards

The GX equips you to accept all fleet cards and bank cards, as well as Apple and Google mobile payments. Every transaction generates automatic reporting to the driver's employer, financial institutions, and your back office in whatever format you specify, including FTP, email, text, or web services integration.
