

→ Comdata® Smart Solutions. One Touch. One System.

↳ Comdata Smart Solutions offer a proven technology and innovative design to help you manage your business more efficiently. With customizable product categories and a user-friendly touch-screen interface, the flexible and modular point-of-sale systems are ideal for consolidating fuel, retail and other profit centers into a single, easy-to-use platform.

→ Comdata SmartDESQ Enhanced fuel transaction processing and pump control

SmartDESQ

SmartDESQ is a point-of-sale solution that provides enhanced processing and pump control for diesel fuel transactions, allowing you to combine payment transactions for the fuel desk and other profit centers into a single system. SmartDESQ works with multiple payment sources, including the leading fleet and credit cards.

- › Delivers efficiency with a configurable touch screen design
- › Integrates fuel desk transactions with retail and other profit centers
- › Provides acceptance of multiple payment types
- › Simplifies end-of-shift reporting
- › Reduces cashier training time and improves productivity
- › Allows pump control and pay-at-the-pump

→ Comdata SmartAuthorize Processing and authorization for diesel fuel purchases

SmartAuthorize

For locations that require basic processing for diesel fuel purchases, the SmartAuthorize point-of-sale solution delivers key transaction functionality and authorization for the major fleet billing companies.

- › Streamlines authorization for the leading fleet billing companies
- › Improves productivity with easy-to-use touch screen
- › Provides configurable product categories to meet your needs
- › Requires minimal cashier training time
- › Integrates with existing back-office systems

→ Comdata SmartConvenience Integrated transaction processing for all profit centers

SmartConvenience

Designed to enhance the efficiency of convenience store operations, SmartConvenience is a streamlined point-of-sale solution with a 17" touch screen that enables processing of both fuel and nonfuel transactions with a single system. SmartConvenience works with multiple payment sources, including the major credit cards.

- › Integrates existing profit centers
- › Provides fast, accurate interface
- › Integrates with major credit and billing services
- › Provides customizable product categories to fit your needs
- › Streamlines transaction processing and end-of-shift reporting
- › Allows pump control and pay-at-the-pump
- › Decreases training time for cashiers

→ Comdata SmartStation Simplified tools for reporting and system configuration

SmartStation

Ideal for supervisors, SmartStation provides a simple way to manage reporting, reconciliation and system configurations. The software module easily integrates with existing back-office equipment and provides the critical intelligence needed to keep your operation running efficiently.

- › Monitors transaction activity and cashier behavior in real time
- › Accesses more than 40 reports, with the ability to export data for analysis
- › Manages product set-up and user-level profiles
- › Customizes payment methods and direct bill accounts
