Press Release - Lime Wind
March 18, 2011

Joseph Millworks Inc. is pleased to announce the completion of financing for its three megawatt Lime Wind project, which will begin construction in July and be operational in November of this year. The Acterra Group, of Cedar Rapids, Iowa, represented Lime Wind in the procurement of a construction loan from one of Acterra's construction lenders in order to build the project.

"Acterra has been on board for quite some time and not only presented the project to our lenders but kept me on track and focused in providing lenders with the information they needed in a timely manner."
Randy Joseph, President of Joseph Millworks/Lime Wind.

"It was our pleasure to work with Randy and Lime Wind by bringing construction financing to the project. Randy is a great example of a true success story in the development of Community Wind – we are very happy to have been part of such a great project." Tad Cooper, Executive Vice President Acterra Group Inc.

About Acterra Group, Inc.

Originally formed in 1958, the Acterra Group is a diversified energy services firm based in Iowa with offices throughout the Midwest. For the distributed wind energy generation market Acterra provides turn-key services including feasibility, design, and construction.
