

The Acterra Group provides fuel equipment distribution, fuel construction and repair services to a variety of Government and private customers. Since 1958, our company has represented some of the largest manufacturers in the fuels industry. Acterra has completed projects large and small, from underground to aboveground. The Acterra team is ready to help assist wherever you need.

Fuels Equipment: Acterra Group is a distributor for many of petroleum equipment manufacturers. From nozzles to vents to meters to pumps we stock and supply nearly everything for fuels.

Recurring Maintenance & Minor Repairs (RMRR)

The Acterra team provides RMRR services at a variety of Air Force, Army, and Navy facilities in the US. Our team, of trained fuels technicians, have performed thousands of repairs on government fueling systems, from Florida to Washington and many states in between as a subcontractor to multiple fuels contractors.

Types of Repairs

Repairs include simple fuel dispenser repairs to elaborate pump and metering system replacements. Typically, services are conducted under routine service orders, but Acterra Group also provides emergency repair services as requested by the Government.

Services

- Fuel System Repair & Replacement
- Coating Applications & Repairs
- Tank System & Walkway Repair & Replacement
- Concrete Repairs & Construction
- Meter Calibration, Repair & Replacement

Fuels Construction

Acterra Group is a full-service fuels construction company. Our work includes installation and design of various types of fueling systems, including Mogas and Aviation fuels. Acterra technicians can provide turn-key services from procurement, to fabrication, to installation.

Mechanical: Crews provide piping and installation of fueling equipment on a variety of POL projects. Acterra factory trained technicians have experience with both aboveground and underground fueling systems. Projects have included construction of POL facilities and infrastructure, tank rehabilitation, fillstands, backup generation fueling and many more projects. Our team is licensed in a variety of US states for underground installations.

Electrical: Acterra electricians have a wide variety of experience providing electrical work in hazardous and explosive environments. Experience includes POL new construction, Class 1, Division 1 piping & explosion-proof wiring, and Underground tank monitoring/fuel system monitoring systems.

Steel Tanks

Acterra Group is a manufacturer of shop fabricated steel tanks. Sizes range from 1,000 – 50,000 gallons for aboveground and underground fuel & chemical storage. Our fabrication facility is certified by Underwriter's Laboratories (UL). Currently the facility builds tanks under UL142, UL2080, UL2085, and UL58. The company is an active member of the Steel Tank Institute (STI) and licenses tank technologies from STI. These technologies include Fireguard® and Flameshield® for aboveground tanks and Permatank® and Act100® for underground tanks.

Tank Rental

Acterra can provide temporary fuel storage for mogas and aviation fuel system. These tanks come completely equipped with pumping and monitoring systems. Tanks can be dropped into place and put into service to meet customer's needs.
